

# Hope Artificial Intelligence

## Scenario Based Learning

A company works with number of employees, all the works are dependents on the employees. Even if one of the employees resign the job immediately then assigned work will be not finished at the time, so delivery of the project to the clients will be delayed. Company planned to make solution for this, they want to know which employee may resign next. If they know previously, they can arrange alternative to avoid such problem. As an AI Engineer you must give Solution to this.

- A) How will you achieve this in AI?
- B) Find out the 3 -Stage of Problem Identification
- C) Name the project
- D) Create the dummy Dataset.

Solution:

Create an “Employee Offboarding Form”. Ask every employee who decides to resign to complete the e-form with their details and feedback. The form should be available at all times on the company’s employee portal. Make it a company policy that employees who decide to leave must submit the form at least one week before their last working day.

- A) I will use Machine Learning to analyze employee form and predict the solution.
- B) Problem Identification: It’s comes under
  1. **Machine Learning**
  2. **Supervised Learning**
  3. **Classification**
- C) Project Name : “Employees Resignation Prediction”
- D) Dummy Dataset:

| Employee ID no. | Name  | Department        | Project Name | Project Stage(1 to 5) | Yrs of Experience | Email and Mobile.no.                                           | Feedback                  | Resignation Yes\No |
|-----------------|-------|-------------------|--------------|-----------------------|-------------------|----------------------------------------------------------------|---------------------------|--------------------|
| 12101           | Vimal | IT- SD            | EMS          | 3                     | 5                 | <a href="mailto:xyz@email.com">xyz@email.com</a><br>1234567890 | Better career opportunity | Yes                |
| 12102           | Kamal | IT-WD             | HMS          | 4                     | 9                 | <a href="mailto:xyy@gmail.com">xyy@gmail.com</a><br>1234567890 | Happy with the job        | No                 |
| 12103           | Kavya | IT-DS             | CRM          | 1                     | 6                 | <a href="mailto:asd@gmail.com">asd@gmail.com</a><br>1234567890 | Work-life balance issues  | Yes                |
| 12104           | Priya | IT- Cybersecurity | SOC          | 2                     | 8                 | <a href="mailto:wqe@gmail.com">wqe@gmail.com</a><br>1234567890 | Not bad                   | Yes                |
